

“Product Liability Aspects of the Risks of Technological Change,” 25 Can.-U.S. L.J. 137, (1999).

Articles

Jan 1, 1999

The author discusses how the development of technology has affected the law of product liability: (1) by generating “technology-forcing regulations” and (2) by the use of technology and electronic record retrieval in the courtroom. He also discusses the “dampening effect” of potential product liability litigation on the creative processes behind technological advancement.
